

The reference for getting into the wifi set up is located at the back of the cable modem Hitron CGN. Referencing the diagram, it is where the device access is.

- 1) Open your browser ( Google Chrome, Mozilla Firefox, Microsoft Edge, Internet Explorer or Safari) and type in at the top of your browser where the white bar is <http://192.168.0.1>
- 2) The browser will load a page which requires you to enter an i.d. And password. These two information are location where the data access of the diagram on page 1.

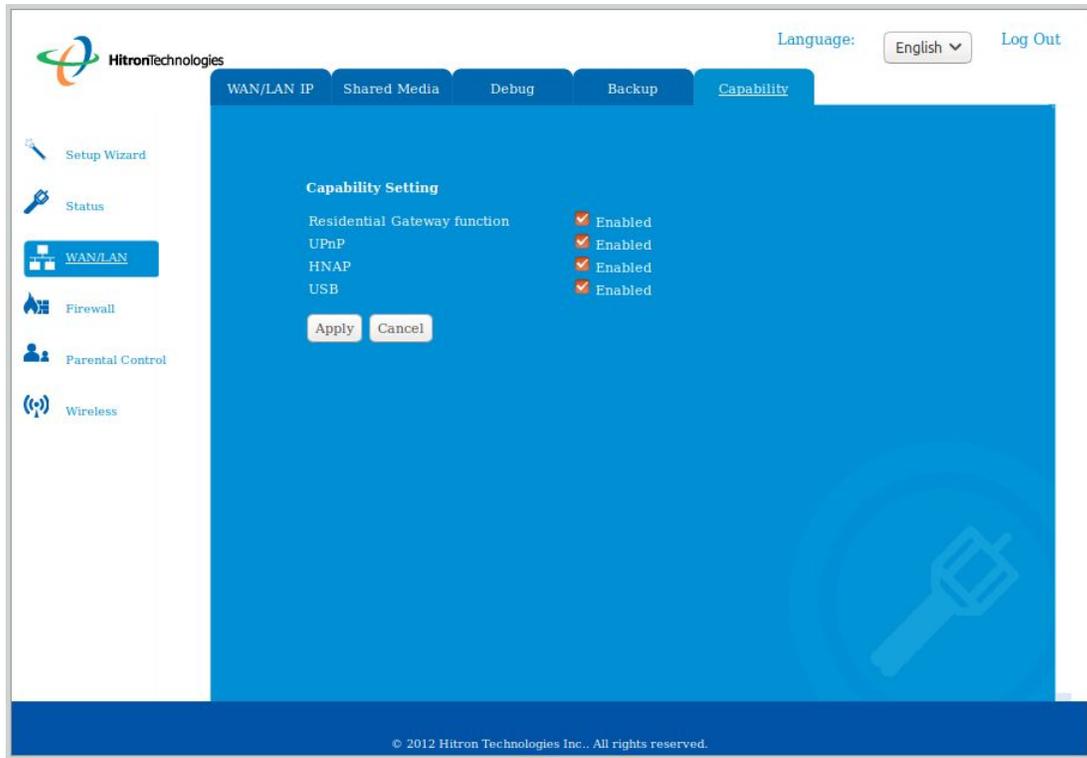

A screenshot of the Hitron Technologies login page. The page has a white background with a light gray border. In the top right corner, there is a language selection dropdown menu set to "English". In the center, there is the Hitron Technologies logo, which consists of a stylized globe icon followed by the text "HitronTechnologies". Below the logo, there are two input fields: "Username:" with the text "cusadmin" and "Password:" with a masked password "\*\*\*\*\*". Below these fields is a blue "LOGIN" button. At the bottom of the page, there is a small copyright notice: "© 2012 Hitron Technologies Inc. All rights reserved."

Default Username is cusadmin  
Default Password is password

You can change it during set up. The default access is also referenced at the back of your Hitron CGN modem by coaxial cable connection.

# Hitron CGN Cable Modem

## Setting up Bridging in your modem router

To get to this setting, you have to click on [WAN/LAN] in the left column. Then click on the last menu tab [CAPABILITY]. You will uncheck the boxes for Residential Gateway Function and USB. To complete this setting, click on the [APPLY] button.
